ABOUT JUDY GAGGERO

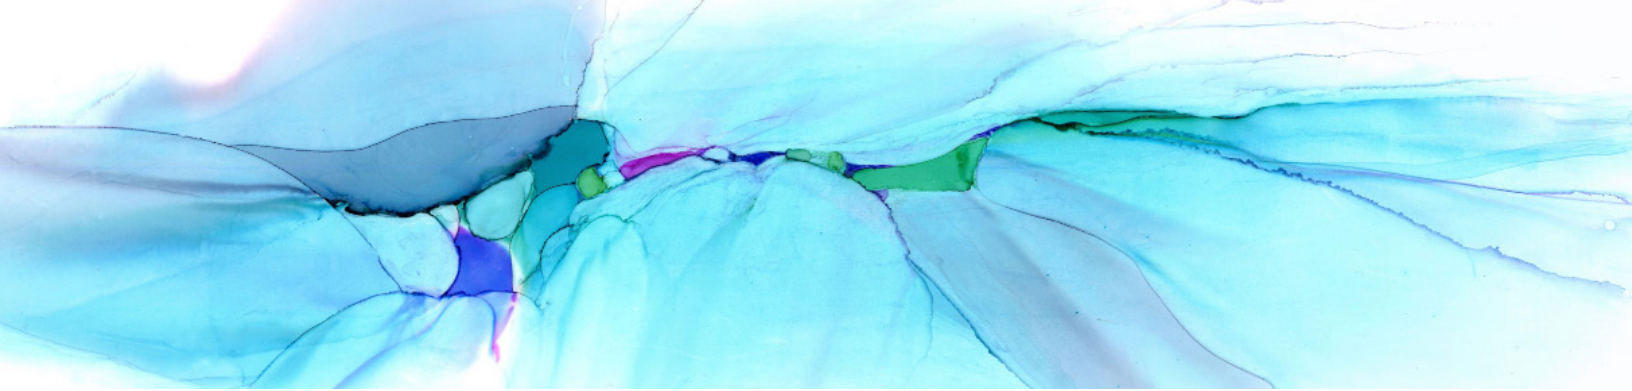

Judy Gaggero, a lifetime painter, is currently working in Alcohol and Ink. This challenging, but rewarding, and totally immersive medium, holds endless possibilities. It is magical. A dynamic flow of vivid color suggests nature's ethereal visions of inspiration and delight. It welcomes a deep dive look into an inner connection with life.

Born in Kansas, America's heartland, Gaggero has lived on each coast, and now resides in Florida. Art education from elementary school through the University of Connecticut, plus abundant study with internationally acclaimed artists, were the building blocks for her art career. Gaggero's ongoing artistic journey is deeply inspired with extensive world travel. Majestic vistas to simple vignettes capture the vibrant movement and energy of nature that is seminal to her work.

When time from painting allows, Gaggero's energy flows through the spirituality of yoga, the competition of tennis, the focus of golf, the curiosity of reading and the satisfaction of volunteer work. But more so, loving relationships with her husband, children and grandchildren binds it all together. These gifts of life are infused in her paintings.

Through the years a diverse range of career paths have enriched Judy Gaggero's artistic and business success; including ownership of Interior Images, Interior Design and JAG, Real Estate. With many awards and affiliations, her paintings hang in both public and private collections nationwide (See the CV for details).

ARTIST STATEMENT

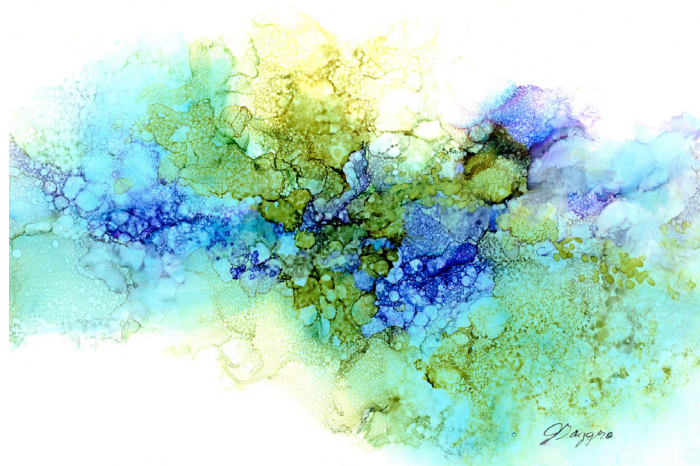

In the Past few years, I have transitioned to painting primarily from watercolor to alcohol and ink. Moving my creativity to a higher level, this medium is my obsessive challenge. It enables me to capture movement and light and develop vibrant color combinations and forms. Through the process I become one with the painting. It speaks to me and I to it; A yin and a yang, a freedom and control. I harness the energy and free flow of ink to achieve my abstract impressions of nature. Dynamic and ethereal, these images are seminal to my work.

Observing an ever changing cloud formation, an ocean wave, or a geological formation, are all powerful visions which provide significant inspiration for my paintings. Mother Nature is my model. The essence of the energy of life has no boundaries. Searching inward for spiritual beauty and meaning, my creative challenge is to bring a thought provoking but joyful journey to viewers to interpret in their own way. It's an invitation to find one's deeper, inner emotions, and explore life's story. A quiet place to contemplate and appreciate the mystery of nature, and the beauty of life. Art shapes our character as it interconnects us with the universe and each other. My goal, as I create, is to share with others the feeling of inspiration and love through a vision. Please enter as I welcome you to my world.

My paintings are in both commercial and private collections nationwide. For more information about me, please refer to my CV.
